

contracting officer determines that (a) the Government already has the data, (b) the data is otherwise readily available, or (c) it is impracticable for the Government to vary its future requirements.

[52 FR 30076, Aug. 12, 1987]

7.204 Responsibilities of contracting officers.

(a) Contracting officers are responsible for transmitting offeror responses to the solicitation provision at 52.207-4 to appropriate inventory management/requirements development activities in accordance with agency procedures. The economic purchase quantity data so obtained are intended to assist inventory managers in establishing and evaluating economic order quantities for supplies under their cognizance.

(b) In recognition of the fact that economic purchase quantity data furnished by offerors are only one of many data inputs required for determining the most economical order quantities, contracting officers should generally take no action to revise quantities to be acquired in connection with the instant procurement. However, if a significant price variation is evident from offeror responses, and the potential for significant savings is apparent, the contracting officer shall consult with the cognizant inventory manager or requirements development activity before proceeding with an award or negotiations. If this consultation discloses that the Government should be ordering an item of supply in different quantities and the inventory manager/requirements development activity concurs, the solicitation for the item should be amended or canceled and a new requisition should be obtained.

Subpart 7.3—Contractor Versus Government Performance

7.300 Scope of subpart.

This subpart prescribes policies and procedures for use in acquisitions of commercial or industrial products and services subject to (a) OMB Circular No. A-76 (Revised) (the Circular), Performance of Commercial Activities, and (b) the Supplement to the Circular.

[57 FR 60575, Dec. 21, 1992]

7.301 Policy.

The Circular provides that it is the policy of the Government to (a) rely generally on private commercial sources for supplies and services, if certain criteria are met, while recognizing that some functions are inherently Governmental and must be performed by Government personnel, and (b) give appropriate consideration to relative cost in deciding between Government performance and performance under contract. In comparing the costs of Government and contractor performance, the Circular provides that agencies shall base the contractor's cost of performance on firm offers.

7.302 General.

The Circular and the Supplement—

(a) Prescribe the overall policies and detailed procedures required of all agencies in making cost comparisons between contractor and Government performance. In making cost comparisons, agencies shall—

(1) Prepare an estimate of the cost of Government performance based on the same work statement and level of performance as apply to offerors; and

(2) Compare the total cost of Government performance to the total cost of contracting with the potentially successful offeror.

(b) Provide that solicitations and synopses of the solicitations issued to obtain offers for comparison purposes shall state that they will not result in a contract if Government performance is determined to be more advantageous (see the solicitation provisions at 52.207-1 and 52.207-2);

(c) Provide that each cost comparison shall be reviewed by an activity independent of the activity which prepared the cost analysis to ensure conformance with the instructions in the Supplement; and

(d) Provide that, ordinarily, agencies should not incur the delay and expense of conducting cost comparison studies when the full-time equivalent Government employees involved are fewer than those specified by law, the Circular, and implementing agency guidance. Cost comparisons may be conducted in these instances if there is
